PROFESSIONAL SUMMARY

Dedicated **Computer Science Engineer** with over **2.5 years of professional experience** in full-stack development (Java, Spring, SQL) at **Tech Mahindra, Pune, India**. Currently specializing in **Python and Generative AI** following a career break. Expertising in building **Agentic AI systems** and **RAG pipelines** to solve complex document-processing challenges. Combines enterprise-grade coding discipline with modern AI foundations to deliver scalable, data-driven solutions.

TECHNICAL SKILLS

- **Modern Focus:** Python (NumPy, Pandas, Scikit-learn), AI Foundations, Prompt Engineering.
 - **Languages & Web:** Java, HTML, JavaScript, RESTful Web Services.
 - **Frameworks & Databases:** Spring 4, Maven, Node.js, SQL.
 - **Development Tools:** Git/GitHub, Eclipse.
 - **Methodologies:** Software Development Life Cycle (SDLC), Unit Testing, Integration Testing.
-

TECHNICAL PROJECTS

1. Project Name -Student grade analytic

[<https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/StudentsGradeAnalytics.ipynb>]

- Developed a Python-based application to calculate grades
- Utilized **Pandas** for data manipulation and **Matplotlib** for result visualization.

2. Project Name – House Price predictor

[\[https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/HousePricePredictor.ipynb\]](https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/HousePricePredictor.ipynb)

- Developed a Python-based application to predict house price by training AI
- Implemented using **LinearRegression** using Scikit-Learn (AI Tool)

3. Project Name -AI Real Estate Content Engine

[\[https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/AgenticAI.ipynb\]](https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/AgenticAI.ipynb)

- Developed a multi-agent workflow to generate high-quality house descriptions and Instagram marketing copy.
- Leveraged **CrewAI orchestration** to separate the "Researcher" and "Copywriter" tasks, improving output precision.
- Integrated **Google Gemini** via Python to handle complex natural language generation tasks.

4. Project Name-Agentic Resume Tailor

[\[https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/AgenticResumeTailor.ipynb\]](https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/AgenticResumeTailor.ipynb)

- Designed an **Agentic AI system** using **CrewAI** to automate resume optimization based on specific job descriptions.
- Implemented a **Retrieval-Augmented Generation (RAG)** pipeline using a **PDF Search Tool** to ground the LLM in factual candidate data.
- Utilized **LangChain** and **Google Gemini** for intelligent text analysis and content generation.
- Ensured data security by managing document ingestion through local session storage.

5. Project Name-Apex Intelligence: The Autonomous Researcher

[\[https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/Apex_Intelligence_The_Autonomous_Researcher.ipynb\]](https://github.com/akshayasanghavi-commits/Learningpython1/blob/main/Apex_Intelligence_The_Autonomous_Researcher.ipynb)

- **Architected a hybrid AI system** using **Object-Oriented Programming (OOP)** to manage complex state and data flow between research agent.
 - **Implemented Unsupervised Machine Learning** (K-Means Clustering) to preprocess and categorize large-scale unstructured text data before LLM inference, reducing token costs by 30%. Utilized **LangChain** and **Google Gemini** for intelligent text analysis and content generation.
 - **Engineered a multi-agent workflow** using CrewAI and Gemini 2.5 Pro to synthesize technical reports from dynamically clustered data sources.
-

PROFESSIONAL EXPERIENCE

Tech Mahindra | *Software Developer* | Sept 2014 – Sept 2016

- Developed and optimized the **Electronic Van Management System (EVMS)** for a major railway client.
- Executed the migration of legacy mainframe functions into modern web-based environments using **Java, Spring 4, and Angular JS**.
- Collaborated on the analysis of technical specifications and design development to improve operational efficiency.
- Managed the end-to-end coding and testing lifecycle, including unit and integration testing.

SSM Infotech | *Customer Relationship Manager* | Nov 2016 – May 2017

- Served as the primary liaison for the **Alarm Information Management System** product.
 - Managed the complete project lifecycle from contract proposal to final close-out.
 - Coordinated with clients to ensure technical delivery met organizational goals.
-

EDUCATION

- **Bachelor of Engineering (Computer Science)** | SIES Graduate School of Technology, Mumbai
 - *Graduated: June 2014*

- **Professional Development:** Currently pursuing certifications and practical projects in **Python for Data Science** and **AI Foundations**.
